ABOUT ME

As an aspiring front-end web developer, I strive to combine my interest in UX/UI design and unique multi-cultural perspective to create attractive, efficient and accessible design for users of all backgrounds.

PROJECTS

Product Design - Language Learning Application

[Currently in development](#)

- Collaborating with the team to create user-friendly interfaces for language learning app
- Gathered application requirements through user interviews and surveys
- Conducting user testing and feedback sessions to refine and improve the user experience
- Refined app design through wireframes and use-case storyboards
- Presented the project development workflow

Personal Portfolio using Bootstrap

[Link to website](#)

- Created an attractive UI using Figma, Bootstrap, and JavaScript to display professional information such as skills, projects, and contact details in an organized, user-friendly format

Weather App using Vanilla JS and API

[Link to website](#)

- Developed a web application using HTML, CSS, and JavaScript that displays live weather information for any selected city or the user's current location through the use of OpenWeather API
- Created an intuitive UI with CSS and JavaScript to easily navigate between cities and view temperature, humidity, and wind speed
